## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-7, 21, and 26-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Taguchi et al. in view of Kellie et al. Taguchi et al. teaches a thermal fixing device comprising a fixing member 1, a first pressing member 13, and second pressing member 14 (figures 2-3; column 5, lines 33-57). The fixing member and the first pressing member apply the temperature to the interface at a position most downstream in the conveyance direction in a contact portion between the fixing member and the first pressing member. The first and second pressing members are surrounded by a belt (figure 1).

Taguchi et al. does not discuss the temperature of the fixing nip wherein the temperature of the first pressing member and the fixing member where they face is not lower than a glass transition point of a developer. Kellie et al. teaches that the fixing nip should be above the glass transition point or softening of the developer. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the teaching of Kellie et al. with the image forming device of Taguchi et al. to set the appropriate temperature for the fixing device.

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 1-7, 21, and 26-27 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2852

***Prior Art***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sato et al. teaches a dual pressure roll fixing device.
